Re: Justification for Label Location

FCC: 2AD9X-VPD

IC: 12637A-VPD

To Whom It May Concern:

Per our label location exhibit, we will place our label on the inside of the housing Lid. The underside of the housing is taped to the wall and would not be seen. The outside of the small sensor housing would degrade the appearance of the sensor in the home. The inside of the Lid is easily accessible and visible.

Sincerely,

A handwritten signature in black ink, appearing to read "P. Justin Carlson".
